WEBSITE PORTFOLIO

Screenshots, feature summaries and process flowcharts

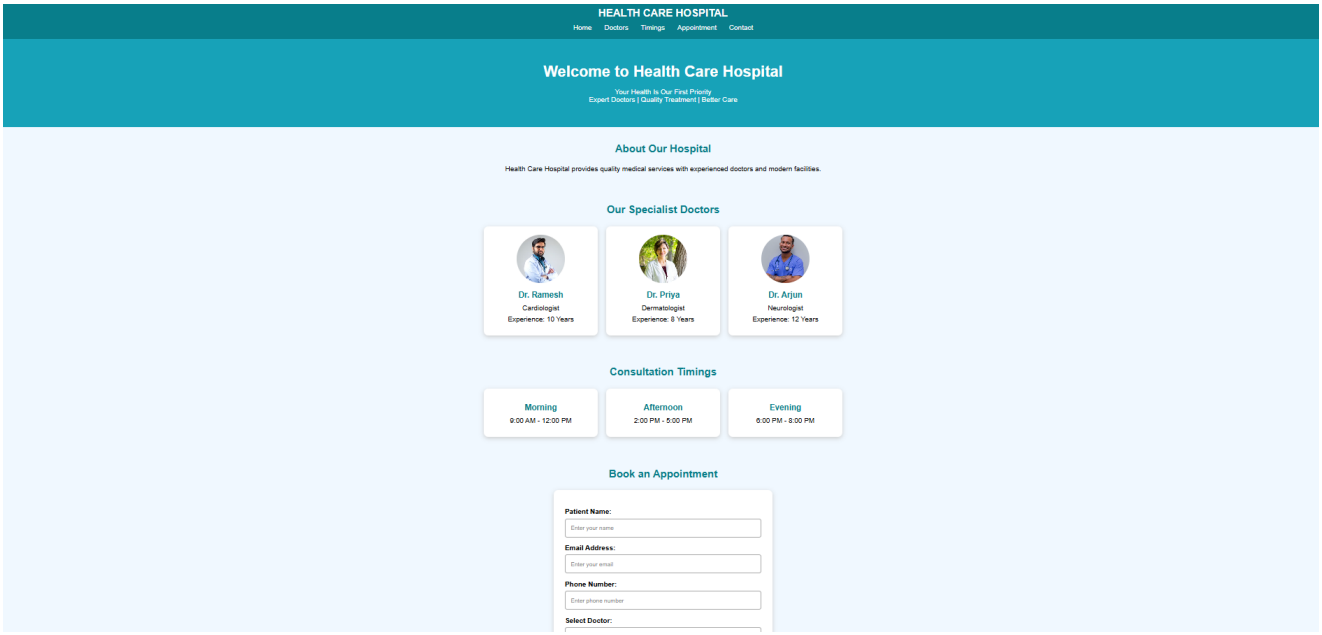

01	**Health Care Hospital**	Doctor information and appointment booking
02	**Food Zone**	Food menu and order journey
03	**ABC College**	Academic information and admissions

Purpose

This document organizes the three supplied website screenshots into a compact portfolio. Each project includes a screenshot, a summary of the visible sections, and a high-level flowchart showing the main visitor journey. The flowcharts describe the apparent intended user flow; they do not imply that backend booking, payment, or submission functions were tested.

01. Health Care Hospital

A healthcare landing page presenting hospital information, specialist doctors, consultation hours and an appointment form.

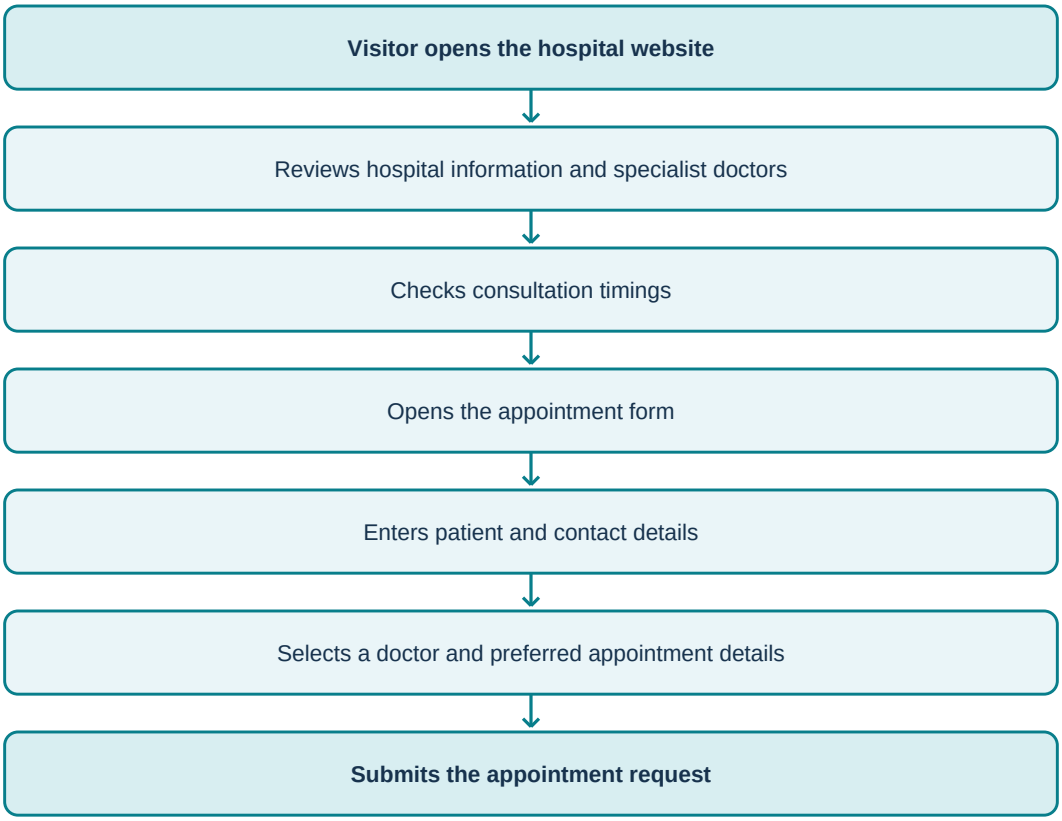

Supplied website screenshot

Visible sections and features

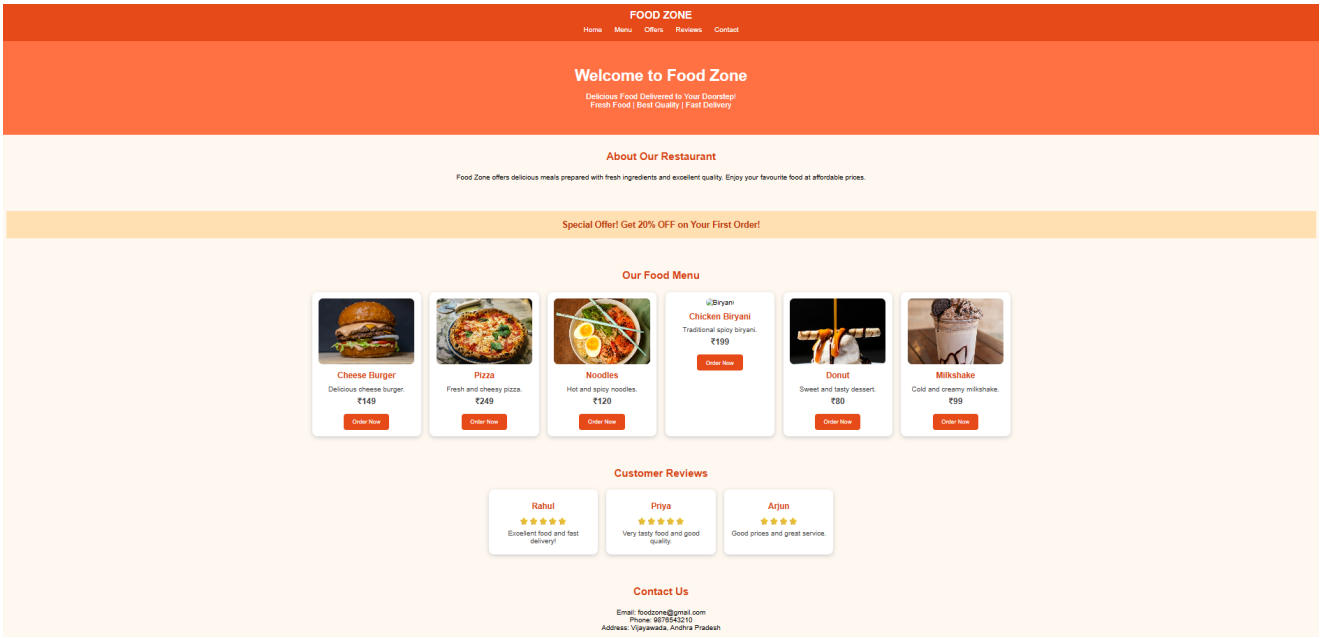

- Navigation links for Home, Doctors, Timings, Appointment and Contact.
- Welcome banner communicating the hospital’s care-focused message.
- About section describing medical services and facilities.
- Doctor cards showing names, specialties and experience.
- Consultation time cards for morning, afternoon and evening.
- Appointment form beginning with patient name, email and phone details.

User journey flowchart

Visitor opens the hospital website
Reviews hospital information and specialist doctors
Checks consultation timings
Opens the appointment form
Enters patient and contact details
Selects a doctor and preferred appointment details
Submits the appointment request

02. Food Zone

A restaurant landing page highlighting food items, promotional offers, customer reviews and contact details.

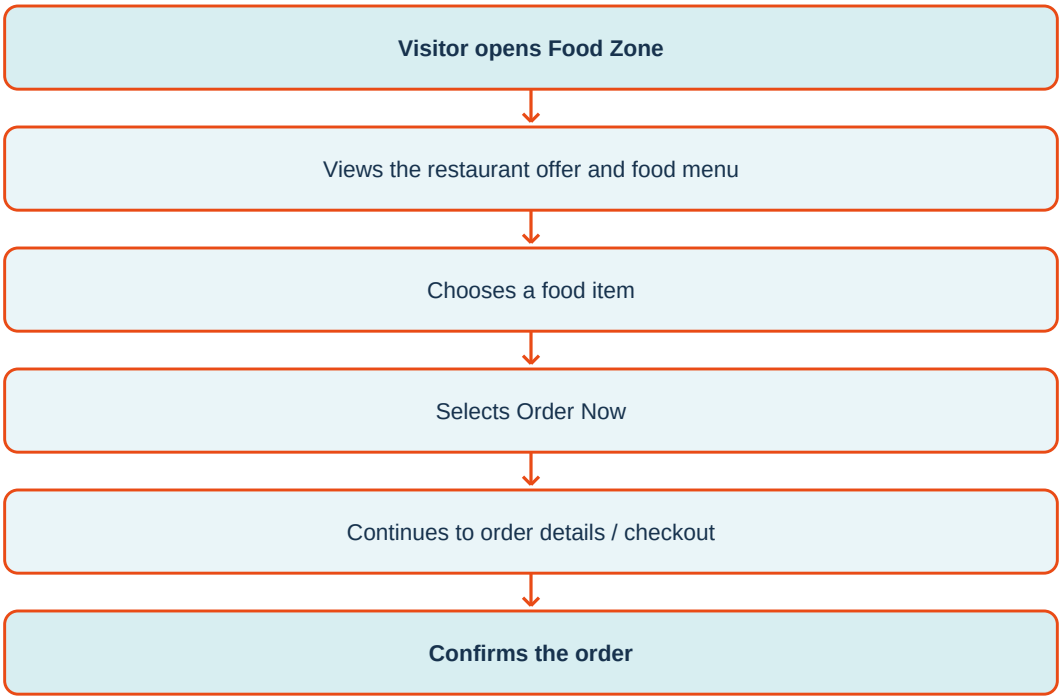

Supplied website screenshot

Visible sections and features

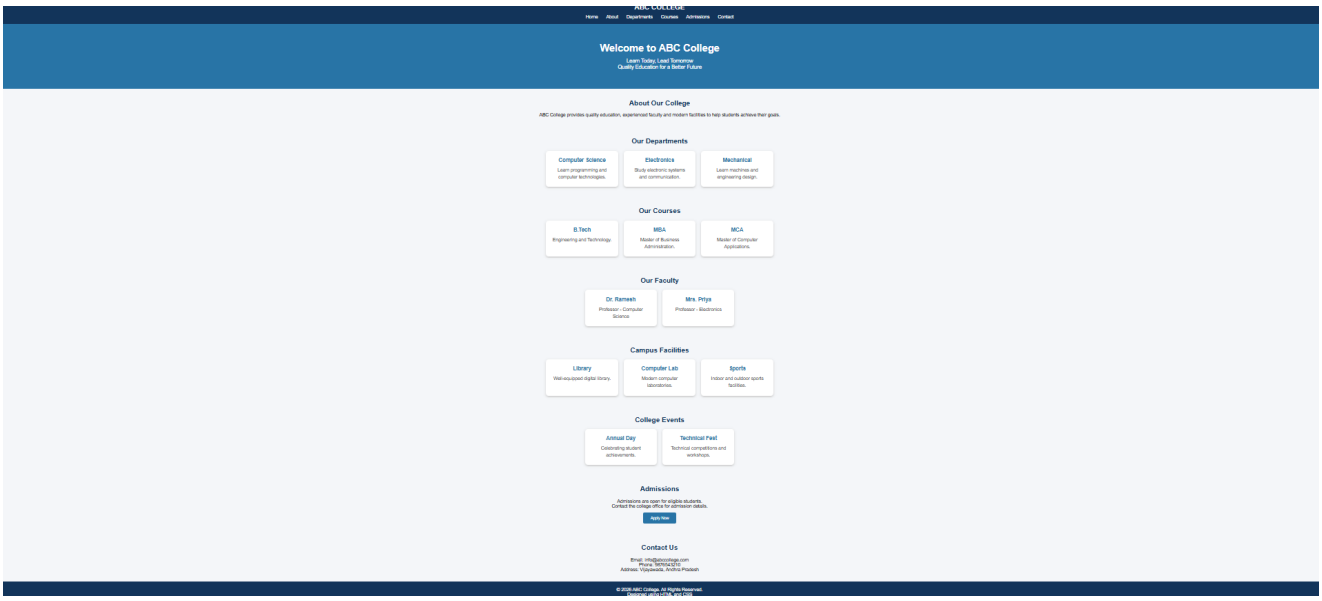

- Navigation links for Home, Menu, Offers, Reviews and Contact.
- Hero banner promoting food quality and delivery.
- Restaurant introduction and first-order discount message.
- Menu cards with food images, descriptions, prices and Order Now buttons.
- Customer review cards with star ratings and short comments.
- Contact section with email, phone and address.

User journey flowchart

Visitor opens Food Zone
Views the restaurant offer and food menu
Chooses a food item
Selects Order Now
Continues to order details / checkout
Confirms the order

03. ABC College

An educational institution landing page presenting departments, courses, faculty, campus facilities, events and admissions.

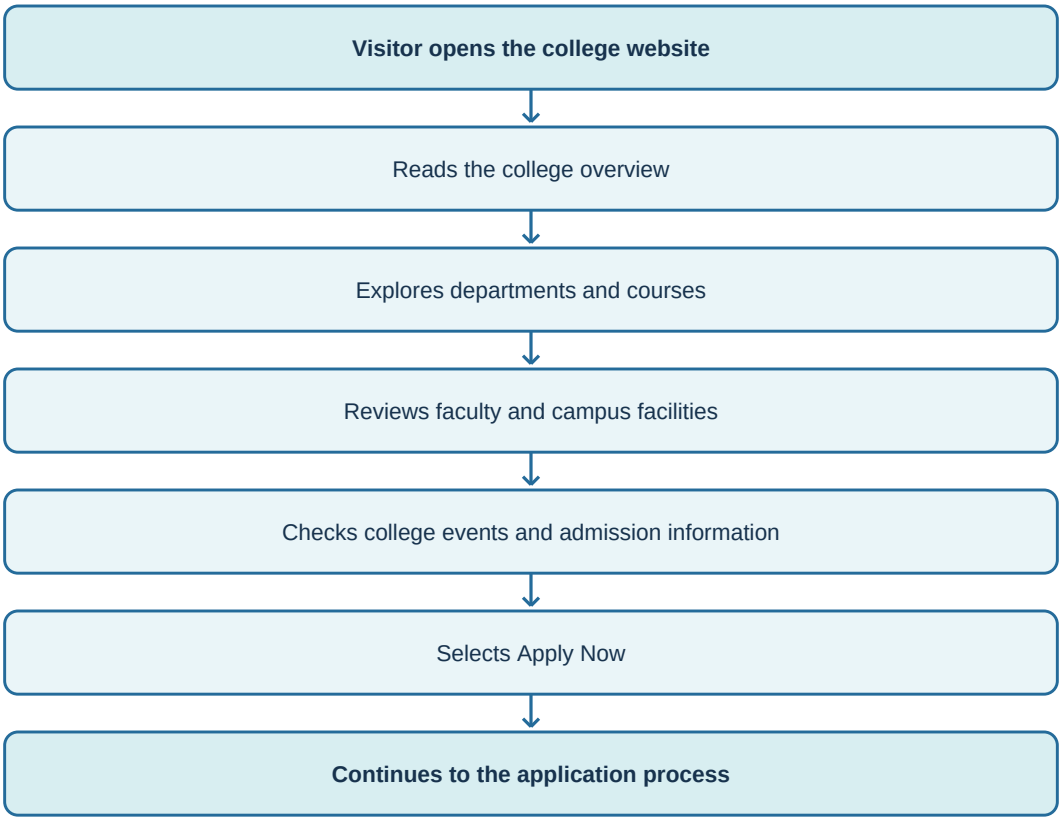

Supplied website screenshot

Visible sections and features

- Navigation links for Home, About, Departments, Courses, Admissions and Contact.
- College introduction and education-focused welcome banner.
- Department cards for Computer Science, Electronics and Mechanical.
- Course cards for B.Tech, MBA and MCA.
- Faculty profiles, campus facilities and college events.
- Admissions information with an Apply Now call to action.
- Contact information and footer.

User journey flowchart

Visitor opens the college website
Reads the college overview
Explores departments and courses
Reviews faculty and campus facilities
Checks college events and admission information
Selects Apply Now
Continues to the application process

Summary and implementation notes

The three designs use a similar landing-page structure: a top navigation bar, a prominent welcome area, organized content sections, and a clear next action. Their primary user goals differ:

Website	Primary visitor goal	Main action
Health Care Hospital	Find a specialist and consultation time	Request an appointment
Food Zone	Browse food and offers	Place an order
ABC College	Explore academic options	Start an application

Suggested functional checks

- Confirm that each navigation link scrolls to the correct section.
- Validate required fields and input formats in forms.
- Show a clear confirmation message after a successful appointment or order submission.
- Connect Apply Now to a real admissions form or application page.
- Test layout responsiveness on mobile, tablet and desktop screens.
- Add accessible labels and alternative text for images and form controls.

Note: The flowcharts are conceptual workflows inferred from the visible page content. The supplied screenshots do not show all form fields or downstream confirmation screens.
